HCG

2020

PACKAGE CATALOG

COMPANY PROFILE

Hocheng Chiu founded the Hocheng Group in 1931 at Yin-Ko, Taiwan. HCG's products skillfully crafted in seamless integration of design and functionality was applauded locally and internationally.

Due to HCG's commitment to excellence and quality added to its success in Greater China, Hocheng Philippines Corporation was established in 1995. The growing demand of the market in the Philippines was catered through the opening of the 10-hectare production facility in 1997 at the First Cavite Industrial Estate (FCIE).

State-of-the-art technology is now fused with a touch of Filipino creativity and ingenuity. Hocheng Philippines Corporation continues to provide innovative products and professional service, making it one of the leading bathroom fixture brands in the country.

HCG stands for
H (Hygiene) – HCG is devoted in providing hygienic solutions for an exceptional bath experience.
C (Comfort) – HCG provides products that ease life and give more meaning to it.
G (Green) – HCG manufactures products supporting the green revolution of the natural environment.

COVER

HCG CERAMIC TECHNOLOGY

HCG S-FORCE FLUSH TECHNOLOGY

Most HCG water closets are made with 3" water tank discharge hole and an enlarged trap way size of 2" from the regular size of only 1.5". Due to this breakthrough, plus a fully glazed trap way, HCG water closet's flushing power is strengthened.

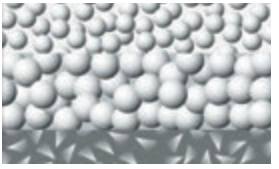
Based on miso tests at the same water consumption, toilets with HCG S-FORCE Flush Technology flushes 12 pieces of miso (600g to 1000g), which is more than the international standard of 7 pieces (350g)

HCG SIPHON VORTEX TECHNOLOGY

Flushes Smoothly, Cleans Instantly.

HCG created this special flushing system to offer a "silent" toilet for a tranquil bathroom.

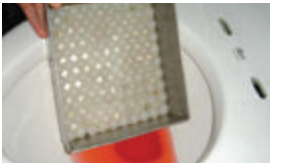
The silent flush is achieved through the special rim and trap way configuration which creates the vortex action under the water's surface. This means the water in the trap way is actually "locked", isolating the flushing noise down to 30db.



ULTRA LOW WATER ABSORPTION

Lesser Dirt Absorption.

With only 0.2% water absorption, much less than the national standard of 0.5%, it absorbs lesser dirt than the normal toilet.



FUNCTION TEST BEFORE PACKING

Strict function test ensures quality.

Each toilet is simulated for its flushing performance before packing.

ALL-ONE-PACKAGE

All tank fittings of HCG toilets are pre-installed in the tank and adjusted to exactly match with HCG standard water consumption. Save your time and enjoy excellent flush performance.

WATER CLOSET FEATURES

LEED COMPLIANT

HCG complies with the most widely used third party verification for green buildings, Leadership in Energy and Environmental Design (LEED). HCG is making items that use water in a much efficient way, adhered to the standards for buildings and communities to be considered a green building.

WATER SAVING

HCG Water Closets consume less water because of the dual flush system. This opts for half flush (liquid waste) and full flush (solid waste) utilized accordingly. Also, the maximum consumption of HCG's water closets are at 4.8 LPF, saving at least 20% water compared to traditional 6 LPF toilets.

ANTI DIRT TECHNOLOGY

HCG ceramic products with anti-dirt glaze all undergo glazing twice and fired in the kiln under 1200°C. The special anti-dirt glaze after firing looks shiny and compact.

HCG ADT glazed ceramic surface appears smooth. A very thin water film will be formed and acts as a barrier between glazed surface and dirt. The dirt will then be isolated to ensure cleanliness.

RIM-X TECHNOLOGY

Rim-X Technology removes rim residues from the inside of the bowl making it cleaner and more hygienic. Once flushed, the water is pushed down from the tank to the bowl without missing any of the closet's inner surfaces.

GEBERIT TANK FITTINGS

Swiss-based GEBERIT is one of the leading suppliers of tank fittings, as the industry pioneer is well known for innovation, durability, and environment-friendly designs. Equipped with GEBERIT tank fittings, HCG toilets guarantees to deliver durable and reliable solution.

ANTI DIRT AND BACTERIA SEAT AND COVER

Same as the surface of HCG's seat and cover is treated with anti-dirt and bacterial coat that inhibits bacterial growth. It kills 99.9% of germs, eliminates odor, and ward-off germs that cause skin irritation.

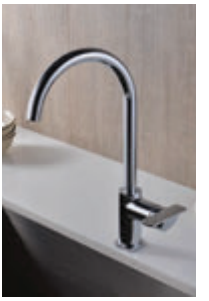
SOFT CLOSING SEAT AND COVER

Live in tranquility with a peaceful bathroom piece. HCG Water closets have a unique roller device to create the soft-closing seat and cover.

FAUCET TECHNOLOGY

HCG MUTE TECHNOLOGY

Water flows quietly and smoothly from HCG faucets. This technology exudes serene and peaceful washing.



SHINING PLATING TECHNOLOGY

This is an advanced technology that allows the faucets to have a smooth, mirror effect. Its sheen will last longer, and this platin g offers extra protection by making the faucet chemical and dirt-resistant.

7° ADJUSTMENT

The high quality 7-degree adjustable technology adjusts water direction in 360 degrees to control water outflow and prevent splashing.

FAUCET FEATURES

HCG VALVE PLUG TECHNOLOGY

HCG's faucet handle with an excellent valve plug technology feels smooth and flexible. It also has a reliable service life of up to 500,000 times.

HCG TEMPERATURE CONTROL TECHNOLOGY

With the wide-angle control, thermostat is more accurate, and effectively prevents the water from being too hot or too cold for an exquisite bath room experience.

LONGER AND TALLER SPOUT

Aside from enhancing its aesthetics, faucets with longer and taller spout provide more hygienic wash and wider compatibility to different design of under and counter top lavatories.

HCG SENSE OF WATER TECHNOLOGY

The different water outflow options bring you a varied sense of rejuvenating freshness.

HCG SPEED-CLEANING TECHNOLOGY

With just a few wipes, accumulated dirt on our faucets is easily removed.

HCG USER-FRIENDLY DESIGN

HCG faucets come with designs easily understood for its functionality. These also come with gentle switches for different functions for the ease of use.
